

Willy Chairullah Fauzi Putra

Full-Stack Developer

Bangkalan, Madura, Jawa Timur, Indonesia | willychairullahfp@gmail.com | +62 851-1745-6670 | [Portfolio](#)

PROFESSIONAL SUMMARY

Fresh graduate in Informatics Engineering with hands-on experience building full-stack web applications, including two ERP systems, a desktop transaction-recording app now in active business use, and a deployed personal finance tracker PWA. Skilled across the stack from database design to responsive UI, with a track record of shipping features end-to-end in production and client-facing environments. Seeking a Full-Stack Developer role to contribute technical execution and continuous learning.

WORK EXPERIENCE

Full-Stack Developer (MBKM Internship)

Feb 2025 – Jun 2025

Procurement ERP System — PostgreSQL

- Developed full-stack features from scratch for an internal procurement ERP system, including role-based access control so different user roles had distinct CRUD permissions.
- Completed a structured 4-month internship program (Merdeka Belajar Kampus Merdeka), delivering functional modules on schedule.

Freelance Full-Stack Developer

Jul 2025 – Nov 2025

ERP System for Oil Distribution Company — Next.js, PostgreSQL, Freelance Team of 2

- Built a client-facing ERP system on a freelance contract with a 2-person team to manage business operations for an oil distribution company.
- Implemented role-based access control so different users had distinct CRUD permissions based on their role.

Freelance Full-Stack Developer

Jun 2025

Mini ATM — Money Transfer Recording System — React, Electron, SQLite, Freelance Team of 2

- Built a desktop application on a freelance contract for a money-transfer counter business, replacing manual, paper-based transaction logging.
- Worked across the stack — React UI, Electron packaging for desktop deployment, and SQLite for local data storage.
- Now in active daily use by the business to record transfer transactions.

PROJECTS

Personal Finance Tracker (PWA)

Aug 2026 · Solo Project

Next.js, TypeScript, Tailwind CSS, Supabase, Vercel

- Built a full-stack Progressive Web App featuring a dashboard with spending charts, budget/category management, and an AI-powered input (Gemini API) that parses natural-language text into structured transactions.
- Extended the app with two bearer-token-secured API endpoints for iPhone Shortcuts integration, and optimized backend performance using Next.js unstable_cache with tag-based invalidation.

Page Chatbot — Chrome Extension

Ongoing · Solo Project

Manifest V3, DeepSeek API, self-hosted OpenAI-compatible proxy

- Building a Chrome side-panel extension that reads webpage content and answers questions using an LLM (via a self-hosted OpenAI-compatible proxy), with streaming responses and persistent chat threads; self-used daily as a browsing tool.

EDUCATION

S1 Teknik Informatika (Informatics Engineering)

Graduated Jul 2026

Universitas Trunojoyo Madura — GPA: 3.81 / 4.00

- Undergraduate thesis (Dec 2025 – Jul 2026): Predicting used iPhone prices using XGBoost, achieving R^2 of 0.9933 and MAPE of 2.59% on ~11,510 scraped records through feature engineering and GridSearchCV/K-Fold tuning.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Python, SQL, HTML, CSS

Frontend: React, Next.js, Vite, Tailwind CSS, Electron

Backend: Node.js, CodeIgniter 3, REST API design

Database: PostgreSQL, MySQL, SQLite, Supabase

Tools & Platforms: Git/GitHub, Vercel, Postman, VS Code

AI/ML & Data: XGBoost, scikit-learn, pandas, Gemini API, prompt engineering

Familiar with (coursework): Express.js, MongoDB
